

2.2 Likert Item Modification

The Likert Items rated by participants in the MATLAB GUI are defined in the file “**likertItems.xlsx**” which is found in the directory NMP-Evaluation-Method-main\Matlab Application\.

Changing the items simply requires modification of the items in the .xlsx file.

Each Likert item is associated with a Likert description used to familiarize participants with concepts at the start of the test protocol.

In order to edit the associated Likert descriptions, the file “**likertDescriptions.xlsx**”, found in the directory NMP-Evaluation-Method-main\Matlab Application, may be modified.
